### Aircraft Maintenance Safety

Use good ergonomic practices such as frequent 30-second micro-breaks and job task rotation to prevent fatigue and injury.

#### AC 43.13

The repairs identified in this AC may only be used as a basis for FAA approval for major repairs. Bump caps protect you from an accidental collision with an aircraft part.

### Aircraft Handbooks & Manuals

Colliding with hard, sharp surfaces or protrusions causes bumps, bruises, and cuts. Work at a steady pace. Evaluate aircraft access areas and job tasks with limited egress and follow confined space procedures if needed.

### Aircraft Maintenance Safety

Properly maintain your tools and follow safety procedures. This data generally pertains to minor repairs.

#### AC 43.13

Tall, heavy aircraft make it hard to see people on the ground when maneuvering in the hangar or maintenance area. Safety glasses, a face shield, and goggles protect your face and eyes, depending on the task and materials.

### Aircraft Maintenance Safety

If an engine starts, you could be severely injured, or small items could be turned into projectiles. Use a fall protection harness where required.

#### AC 43.13

Posted at 10:09h in , , , by Aircraft Maintenance Safety Aircraft maintenance work includes inspection and repair of aircraft structures, coatings, and systems in hangars and on the air field.

#### **AC 43.13**

A respirator may be needed to control dusts from grinding and sanding operations.
