### Drinking Water Data and Reports

In Nebraska, plumbing materials containing high concentrations of lead were banned in 1987.

### Water Quality

Water testing conducted by Lincoln Water System has found detectable levels of lead and copper in homes built before 1988.

### Drinking Water Supply & Quality Report

Customers should also be aware that lead-containing materials can be found in other locations of the home plumbing constructed before 2014 when lead-containing materials were banned from use.

### Water Quality

Designated watering days for these properties are on Sundays, Tuesdays and Fridays.
