There are no specifics in relation to the right to strike for employees in the health care sector in Norway.

Nevada Safety and Health On

All together, FVG comprises about 2000 member companies. Has single-employer collective bargaining introduced specific clauses or instruments to address these challenges at company level? This includes the establishment of public—private partnerships in building infrastructure and the outsourcing of non-critical business functions to private companies.

Industrial Relations vs. Human Resource Management: The Difference

The number of employees is not available. This means that, while individuals are keen to extend the period they can live more or less independently in their own home, they require ever more skilled individuals to support them in times of serious ill-health.

Coalition's industrial relations bill is a 'threat to public health', experts warn

In facing these changes, it is important to bear in mind the current predominance of women in the workforce, who often combine their career with family life. However, the unions are unified in their approach to collective bargaining, public policy consultations and the implementation of policy priorities.

Industrial Relations

Those employed in the private sector are covered by a variety of sectoral, branch and company agreements, especially in the hospital sector. This appears in line with the trend towards an ageing population, but is by no means true for all countries. In practice, two care workers often share the job between them.

Department of Labor and Industrial Relations

Key developments and trends in the health care sector 1.

Department of Labor and Industrial Relations

At the same time, a relatively high number of strikes and protests have taken place within the sector in countries such as the Czech Republic, France, Ireland, Poland, Slovakia and Spain; such strikes have focused primarily on pay disputes. Setting wages and terms and conditions in the public sector In the public sector, wage setting tends to be centralised either at national or regional level. Other well-established, permanent tripartite dialogue processes involving discussions on the future of health care policy, reform and service planning exist in Bulgaria, the Czech Republic, France, Ireland, Poland, Portugal, Slovenia and Slovakia.
