A well-written program should read like a piece of prose, not a bunch of gobbledygook.

The future of COBOL is now

By 2019, the number of COBOL programmers was shrinking fast due to retirements, leading to an impending skills gap in business and government organizations which still use mainframe systems for high-volume transaction processing. These guidelines are extremely flexible, but without additional guidelines the resulting code can be as manageable as a plate of limp spaghetti - please read on for your elucidation and edification.
