Plane Trigonometry and Tables by William Anthony Granville

For example : The functions of 2200® 6 x 360® + 40® are equal to the functions of 40®.

Plane trigonometry with tables (0070279314) by Heineman, E. Richard

Find the cube roots of 1. In Case IV give another way of finding b, after the angles have been found. In reading an angle, the letter on the initial side is read first to give the proper sense of direction.

Trigonometry

Use perpendicular and horizontal axes intersecting where the hands are fastened.

Trigonometry

Values for all angles that have a given sine or cosecant. . Find the common logarithm of 762, its natural logarithm being 6.

Trigonometry (Table, Formulas and Solved Examples)

Write out a scheme for finding the value of 9. The base of a triangle is 825 ft. We are a family business, and your satisfaction is our goal! Since an increase of 10 in the number increases the mantissa 0.
