Assisting Students with Learning Difficulties

. This blog looks at a recent study which aimed to examine the experiences and views of IAPT workers about providing therapy for people with learning disabilities. Each filter comprises index terms relating to the study type s and associated text words for the methodological description of the design s.

Support for carers of adults with a learning disability

They should do so in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities. FDA is adding a new warning to the drug labels for all olanzapine-containing products that describes this severe condition known as Drug Reaction with Eosinophilia and Systemic Symptoms DRESS.

NHS England » The learning disability improvement standards for NHS trusts

Do not offer sensory interventions for example, Snoezelen rooms before carrying out a functional assessment to establish the person's sensory profile.

Assessment of mental health problems in people with learning disabilities

People with a learning disability can have a broad range of difficulties, so the care setting and interventions need to be adapted and tailored to each person's preferences, level of understanding, and strengths and needs.
