They have greatly contributed to the quality of this book. Concurrent Engineering: Research and Applications, 23, 1063293—15591038. Scholten received the ISA Standards and Practices Award for her outstanding contribution to the technical report Using ISA-88 and ISA-95 Together.

The Hitchhiker's Guide to Manufacturing Operations Management: ISA

Life cycle assessment LCA applied to the process industry: A review.

The Road to Integration : A Guide to Applying the ISA

To implement ISA-95 in practice, however, you will need to consult the various parts of the standard. She is a voting member of the ISA95 committee.

Intelligent Manufacturing Control Systems: The Core of Smart Factory

This composition capability provides the foundation for the ability to predict the performance of the system from the performances of its components—called compositionality. In our quest to reap the rewards of all these investments, the gap between business automation and process automation is becoming painfully obvious. Because neither the author nor the publisher has any control over the use of the information by the reader, both the author and the publisher disclaim any and all liability of any kind arising out of such use.

ISA Releases Road to Integration: A Guide to Applying the ISA

To be competitive, actual manufacturing operations activities must be highly interactive in supply chain and enterprise processes for effective collaboration and competition. For those problems, compositionality can be achieved using a three-tiered, abstraction architecture. International Journal of Services Sciences, 1 1 , 83—98.

Intelligent Manufacturing Control Systems: The Core of Smart Factory

When manual data entry and reconciliation processes with long delays in data entry are replaced with near real-time information, then ERP reports and predictions can be based on actual values instead of estimates.

Formats and Editions of The road to integration : a guide to applying the ISA

Against this backdrop, ISA decided in the 1990s to develop the ISA-95 standard for integrating enterprise and control systems in order to reduce the risks, costs, and errors that go hand in hand with implementing manufacturing control systems and integrating them with ERP systems.
